

```
if (document.addEventListener) { document.addEventListener("DOMContentLoaded",
window.print(), false); } // for Internet Explorer (using conditional comments) /*@cc_on @*/
/*@if (@_win32) document.write(""); var script = document.getElementById("__ie_onload");
script.onreadystatechange = function() { if (this.readyState == "complete") { window.print();
// call the onload handler } }; /*@end @*/
```

Heart disease is the No 1 contributor to UAE deaths - Poll says!

Posted by: 0 in [heartsmart](#) , [health](#) on Oct 8, 2009

Heart SMART[®]
Diagnostics

A new survey has disclosed that 43% of deaths in the UAE is the result of cardiovascular disease. This statistic is alarming and shows no evidence that it will decline in the foreseeable future. The correlation between heart disease, diabetes, strokes and obesity is beyond refute. Medical practitioners are stressing the importance of diet and exercise for a healthy life style. The UAE has one of the worst heart and diabetes history in the world.
